Buttholz® shuttering panels

LONGER SERVICE LIFE THANKS TO INNOVATIVE TECHNOLOGY

Intensive use, temperature fluctuations and the effects of the weather place enormous demands on shuttering panels. Thanks to their unique construction technology, Buttholz® shuttering panels have a significantly longer service life than conventional products. This means better cost efficiency for customers.

LOGO PRINT

With the option of personalising your Buttholz® shuttering panels, you can advertise with your printed logo.

Personalisation clears up claims to ownership, indirectly protects against theft and encourages people to handle the panels more carefully.

SURFACE

The smooth melamine resin coating guarantees a clean concrete surface and optimal moisture exchange.

DIMENSIONS AND ANGLES

We guarantee maximum dimensional and angular precision.

MIDDLE LAYER

The continuous middle layer makes breaking-off of the longitudinal edges impossible.

EDGE SEALING ON ALL SIDES

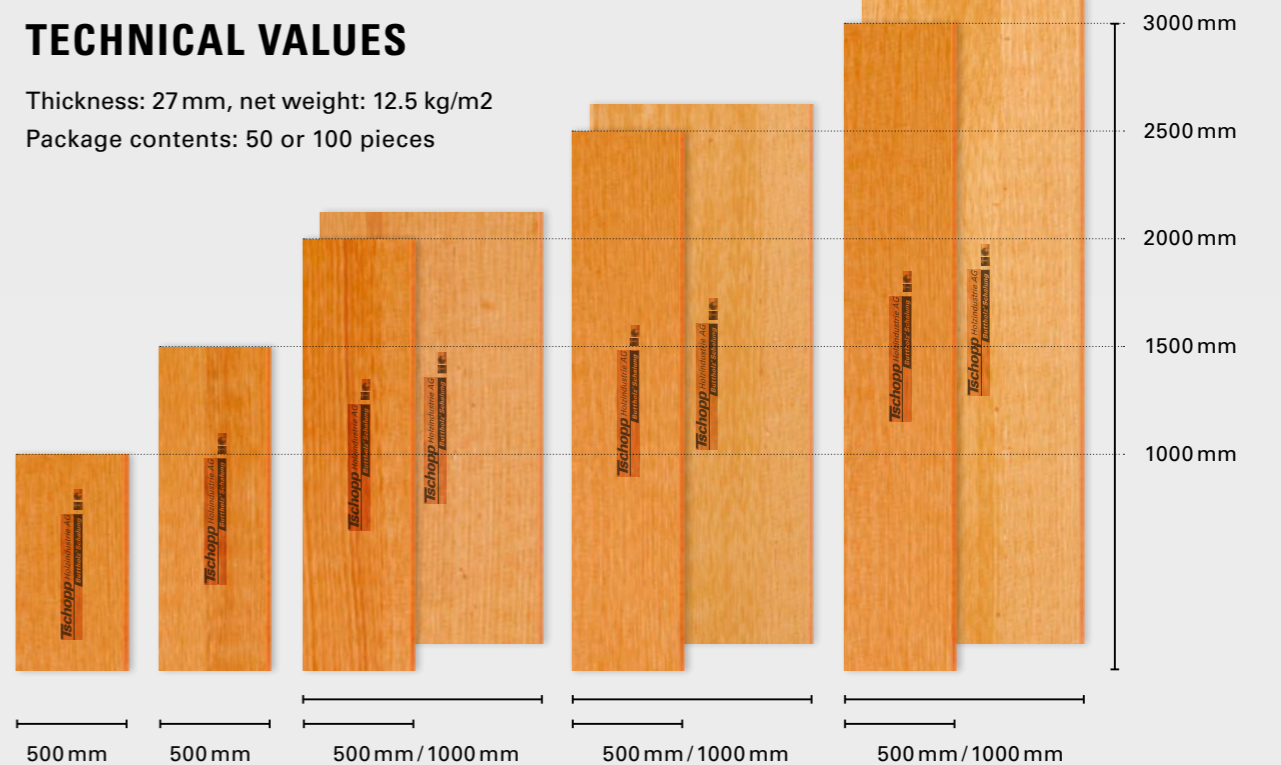

Buttholz® shuttering panels are characterised by unique four-sided edge sealing. This prevents adhesion of concrete residues and facilitates cleaning. The high quality means that the shuttering can be used for more applications.

Excellent results for exposed concrete

TECHNICAL VALUES

Thickness: 27 mm, net weight: 12.5 kg/m²
Package contents: 50 or 100 pieces

Your design, your shuttering panels

LOGO AND COLOURS

As a special option, we can print your logo on the surface of the shuttering panels. The colour of the surface coating and the edge sealing can also be changed on request. How does this benefit you? Personalisation deters thieves and encourages more careful handling of the panels. Plus you can also advertise your business with your customised, well-maintained panelling!

LOGO

Your logo on the panel surface!

- Advertising
- Clear ownership
- Protects against theft
- Order quantity from 500 m²

EDGE COLOUR

Longitudinal and front edges sealed in your company's colour!
